 GitHub |  LinkedIn |  EmailID: sathvika.talari04@gmail.com | Location: Hyderabad, India

SUMMARY

Computer Science student with experience in Python development and web application design using the Flask framework. Skilled in problem solving, software development, and collaborative project work. Interested in applying technical knowledge to real-world challenges while continuously learning modern technologies and improving software engineering practices.

WORK EXPERIENCE

Alonzo AI

May 2026 - June 2026

(Web Development Intern — Medical Camp Management System — Full Stack and AI-ML)

- Developed a full-stack solution using React JS, Django and SQLite3 to automate patient registration, medical inventory tracking, reporting for medical camps, and real-time stock monitoring.
- Implemented secure role-based access control and optimized database management while actively debugging and maintaining system stability to ensure reliable camp operations.

PROJECTS

LearnSphere – AI-Powered ML Learning Platform

[Link to Demo](#)

- Built an AI-powered learning platform allowing educators to create structured courses, multimedia lessons, quizzes, and assessments.
- Integrated Generative AI for concept explanations, coding assistance, and personalized academic guidance.
- Developed using Python, Flask, HTML, CSS, JavaScript, and APIs with features like dashboards, progress tracking, and certificate generation.

Hotel Management System

[Link to Demo](#)

- Developed a full-stack hospitality management system supporting room booking, guest check-in/check-out, and reservation management.
- Implemented role-based authentication for admin, staff, and guest users with operational dashboards.
- Built using Python Flask, SQLAlchemy, HTML, CSS, JavaScript, and Bootstrap with features like invoice generation and booking tracking.

Automata Simulator

[Link to Demo](#)

- Developed an interactive application to visualize and simulate formal language theory concepts such as DFA, NFA, and Regex conversions.
- Implemented algorithms including Thompson Construction, Subset Construction, and Hopcroft's DFA minimization.
- Built using Python Flask backend and JavaScript frontend with dynamic graph visualization and step-by-step execution tracing.

- Developed a disaster management platform with role-based access for students, faculty, parents, and administrators.
- Designed features including learning modules, quizzes, virtual drills, and real-time alert notifications.
- Built using HTML, CSS, JavaScript, Node.js, Express.js, Next.js, TypeScript, and MySQL with secure authentication.

EDUCATION

2023 - 2027	Bachelor's Degree at Stanley College of Engineering and Technology	(CGPA: 9.43)
2022 - 2023	Class 12th CBSE Board	(7.5)
2021	Class 10th CBSE Board	(7.5)

SKILLS

Programming Languages:	Java, Python, JavaScript, C.
Web Technologies:	HTML, CSS, Bootstrap, NodeJS, PHP.
Frameworks:	Flask, React, Bootstrap, Streamlit, AngularJS.
Databases:	MySQL, SQL lite.
Tools:	Git, GitHub, VS Code.
Areas of Interest:	AI-ML, Web Development, Web3, Competitive Programming.

ACHIEVEMENTS

- Secured **3rd place** in Gen AI Hackathon conducted by SmartBridge.
- Winner of Ideathon Competition and received Entrepreneurship training at **WE-Hub Headquarters, Hyderabad**.
- Selected for **Internal Round of Smart India Hackathon (SIH)**.

CERTIFICATIONS

- Python Programming and Development Certification – Vault of Codes
- Web Development Course by Angela YU – Udemy

HOBBIES

- Competitive Programming and Problem Solving
- Exploring Artificial Intelligence and Emerging Technologies
- Participating in Hackathons and Tech Competitions
- Reading about Technology and Innovation

EXTRACURRICULAR ACTIVITIES

- Participated in multiple hackathons and innovation challenges focused on developing practical technology solutions.
- Volunteered at the International Rice Conference, helping in event coordination and supporting participant activities.
- Actively involved in technical learning communities and peer discussions on programming and software development.
- Experiencing new technologies regularly and building small projects to strengthen programming skills.
